OLS estimates based on yearly data from ISIC 382, 383 and 385 in 1982-1995. The sample is moderately trimmed, cf. the data appendix. Robust standard errors in parenthesis. Time dummies are included in all regressions. Industry dummies at the five digit SIC level. are included in the OLS regression. The R&D subsidy share is the sum of deflated R&D subsidies over the three years prior to the year of observation divided by the corresponding sum of total R&D investments. If only one or two years prior to the year of observation is available, the subsidy share is based on this information alone. The R&D dummy is one if the firm has reported R&D in one of the the three years prior to the year of observation.

- \*\*\* Significant at the 1% level  
\*\* Significant at the 5% level  
\* Significant at the 10% level

**Table 3. The aggregate development for R&D firms established in ISIC 382, 383 or 385 not later than 1985**

	R&D firms with R&D subsidy share less than 5%			R&D firms with R&D subsidy share greater than or equal to 5%		
	1985	1995	Growth	1985	1995	Growth
Private R&D investments	990	850	-14%	810	660	-18%
-average	8.8	10.5	19%	8.4	9.9	17%
R&D intensity	4.1%	4.8%	15%	8.1%	6.7%	-17%
Employment	22280	14940	-33%	16480	9400	-43%
-average	199	184	-8%	172	140	-19%
Sales	14530	18080	24%	10380	12370	19%
-average	130	223	72%	108	185	71%
Labor productivity	151	253	68%	146	253	74%
Capital intensity	0.46	0.66	44%	0.61	0.97	60%
Return on assets	19.1%	24.7%	30%	12.4%	18.0%	45%
Return on sales	13.4%	13.5%	0.5%	11.9%	13.2%	11%
No. of plants	112	81	-28%	96	67	-30%

The subsidy share is the part of the firm's deflated R&D investments in 1985-1993 which was financed by public grants.

R&D investments are deflated by a wage index and given in millions of 1995 NOK. Sales are given in nominal millions NOK.

Labor productivity is value added per manhour in nominal NOK. Capital intensity is assets per employee, given in nominal millions NOK.

The calculations are based on plant level data.

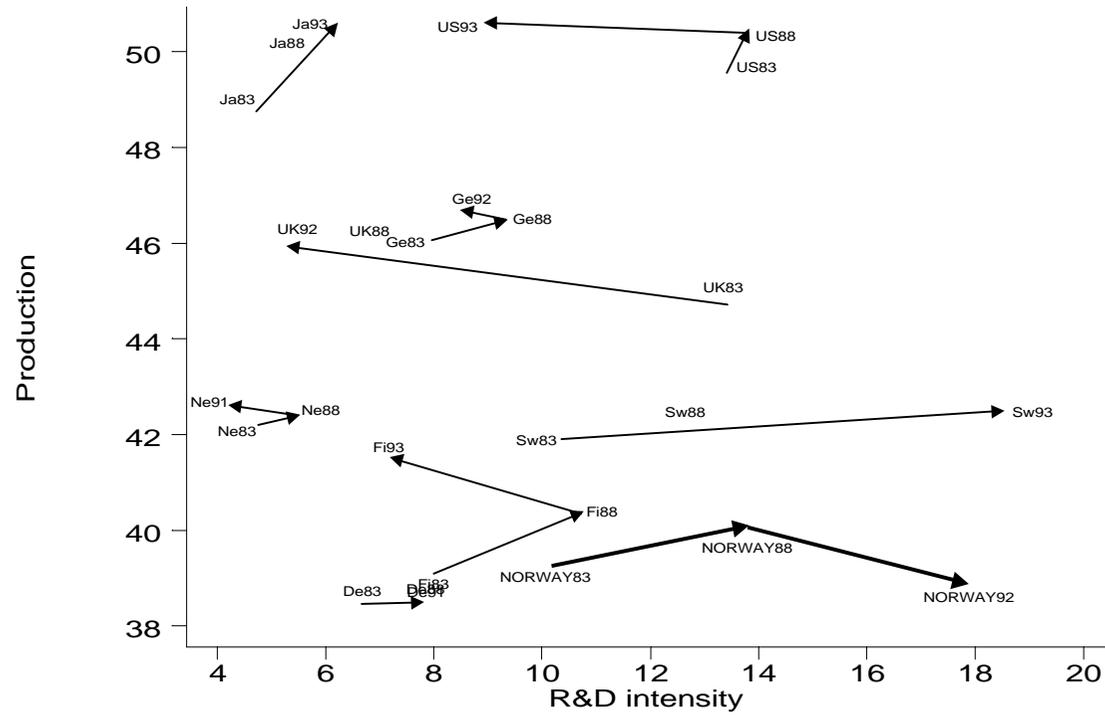

**Table 4. The importance of high technology and IT relative to total manufacturing**

	1983		1987		1991		1995	
	Norway	OECD	Norway	OECD	Norway	OECD	Norway	OECD

Subs. as share of tot. intramural R&D	12%	11%	20%	10%	15%	8%	-	-

ISIC 382, 383 and 385. The OECD columns give the aggregate of 13 major industrialized countries for which we have complete data. These are Norway, Sweden, Finland, Denmark, Germany, UK, France, Italy, Spain, USA, Canada, Australia and Japan. All variables, except subsidy as share of total intramural R&D, are measured in percent of all manufacturing industries.

Source: OECD, DSTI(STAN, ANBERD and BERD).

**Figure 1. R&D intensity and production in the IT industry (ISIC 3825 and 3832).  
Norway compared to other OECD countries.**

Production is measured as the log of gross output in 1985 dollars. R&D intensity is R&D investments in percent of gross output.
