

Table 2 Estimated elasticities of unemployment on earnings, 1990.

	<i>N</i>	I	II	III	IV	V	VI	VII
<i>Natives</i>	282 891	-.115 (20.70) [.002]	-.099 (20.46) [.250]	-.101 (20.68) [.260]	-.048 (8.30) [.262]	-.048 (8.30) [.262]	-.004 (.77) [.339]	-.004 (.77) [.339]
<i>OECD</i>	38 006	-.101 (5.97) [.001]	-.130 (8.39) [.167]	-.112 (7.01) [.176]	-.089 (4.64) [.179]	-.089 (4.68) [.181]	-.025 (1.37) [.266]	-.026 (1.42) [.267]
<i>Non-OECD</i>	28 682	-.408 (13.63) [.006]	-.368 (12.78) [.083]	-.373 (12.58) [.093]	-.167 (4.30) [.102]	-.217 (5.79) [.165]	-.082 (2.51) [.358]	-.113 (3.50) [.380]
Individual characteristics		No	Yes	Yes	Yes	Yes	Yes	Yes
Municipality characteristics		No	No	Yes	Yes	Yes	Yes	Yes
Regional dummies		0	0	1	7	7	7	7
Unemployment experience		No	No	No	No	No	Yes	Yes
Year since immigration		No	No	No	No	Yes	No	Yes

Notes. Absolute values of t-statistics in parantheses, adjusted R² values in square brackets. Column I-V is based on specification (2) and column VI-VII on specification (5). Individual characteristics are age, age squared, gender, two dummies for marital status and six dummies for educational attainment. Municipality characteristics are 8 dummies for industry structure. In III the regional dummy is for Northern Norway. Years since immigration in V and VII enters as dummies for arrivals in 1965-69, 1970-74, 1975-79 and for each of the years 1980-88.
