

LandBruk seminarrekke vår 2025

Våren 2025 arrangerer LandBruk en månedlig seminarserie som inviterer fem foredragsholdere til å utforske presserende problemstillinger rundt arealbruk i Norden. Vi ønsker alle med interesse for antropologiske studier av landbruk og arealbruk velkommen til å bli med oss ved Sosialantropologisk Institutt (SAI).

Tid & Sted: **Tirsdager 16.30-18.30** på SAI, rom 929, 9. etasje, Eilert Sundts hus, Universitetet i Oslo og [online via zoom](#).

Climate smart agriculture metrics and challenges for agroecology

LandBruk er en gruppe forskere og studenter som diskutere sammen antropologiske perspektiver på arealbruk i Norden, tilknyttet forskningsgruppen NORLAB (Nordisk Laboratorium). Vi jobber for å bygge kritisk antropologisk teori og verktøy for å forstå dagens problemstillinger og utfordringer innen landbruket, alternative måter for matproduksjon og levebrød på landsbygda. Vårt arbeid spenner over omstridte nordiske landskap, arven etter landbrukspolitikk og -praksis, og moderne visjoner om bærekraftig bruk av land i Norden, derav tittelen LandBruk.

LandUse seminar series spring 2025

In spring 2025, LandUse is organising a monthly seminar series inviting five speakers to explore pressing issues faced by land use in the Nordics. We welcome everyone with an interest in anthropological studies of agriculture and land use to join us at the Department of Social Anthropology (SAI).

Time & Place: **Tuesdays 16:30-18:30** at SAI, room 929, 9th floor, Eilert Sundts hus, University of Oslo and [online via zoom](#).

Climate smart agriculture metrics and challenges for agroecology

LandUse is a group of researchers and students who come together to discuss anthropological perspectives on land-use in the Nordics, and an extension of the research group 'Nordic Laboratory'. We work towards building critical anthropological theory and tools for understanding the present issues and challenges in agriculture, alternative modes of food production, and rural livelihoods. Our work spans contested Nordic landscapes, the legacy of agricultural policy and practice, and contemporary and alternative visions of sustainable uses of land in the Nordics, hence the title LandUse.
