

SUSTAINABILITY IS NOT A NUMBER – CLIMATE CRISIS AND HUMAN CULTURAL EVOLUTION

Meet two of the world's leading professors in evolutionary science **David Sloan Wilson** (Binghamton, New York) and **Terrence W. Deacon** (Berkeley, California) who will explain what went wrong in human evolution. Even 1.5°C global warming is not a safe target because sustainability is a complex dynamics, not a number. Talks followed by discussions with a panel and the audience.

Chair: **Thomas Hylland Eriksen**

Litteraturhuset, 29 June, 19-22
